EDUCATION

Vellore Institute of Technology, Vellore
B. Tech in Computer Science and Engineering (Cybersecurity)

07/24 – Present
CGPA: 9.31

TECHNICAL SKILLS

Languages: Python, Java, C, C++, JavaScript, TypeScript, SQL, R, HTML, CSS.

Technologies/Frameworks: React, Next.js, Node.js, Tailwind, MongoDB, Git, Linux, Docker, AWS.

Coursework: Data Structures and Algorithms, Design and Analysis of Algorithms, Structured and Object-Oriented Programming, Computer Architecture and Organization, Web Programming.

EXPERIENCE

Recipharm

IT Intern

06/26 – 07/26

- Assessed endpoint security and threat coverage via **CrowdStrike Falcon** within GMP-regulated infrastructure.
- Analyzed enterprise DR and BCP strategies, evaluating backup redundancy and recovery gaps using **Veritas**.
- Performed Computer System Validation (CSV) across IT systems to support regulatory compliance.

Cyber Defenders

Cybersecurity Intern

06/26 – 08/26

- Engineered an AWS SSH honeypot using **Beelzebub** with an LLM backend for adaptive Linux shell emulation.
- Developed a Python telemetry pipeline for log parsing, Geo-IP enrichment, and automated attack reporting.
- Profiled attacker behavior via credential analysis, command categorization, and SSH client identification.

Google Developer Groups (GDG) On Campus VIT Vellore

Senior Core Member

04/25 – Present

- Selected among the top **1%** of 4,000+ applicants for the Inner Core team.
- Raised **1.8L+** in sponsorships via partner outreach and coordination for large-scale hackathons.
- Planned and executed high-profile events including DevJams'25, a flagship hackathon with **750+** participants.

CodeChef-VIT Student Chapter

Senior Core Member

02/25 – 07/26

- Selected among the top **3%** of 2,000+ applicants for the Junior Core team.
- Contributed to technical projects and knowledge dissemination within the **Cybersecurity** domain.
- Conducted cybersecurity workshops and technical interviews, and designed tasks for recruitment drives.

PROJECTS

🌐 Papers – CodeChef VIT | **Next.js, TypeScript, TailwindCSS, MongoDB**

- Maintained Papers, one of VIT's most-used platforms for previous year question papers, serving **55K+** users and generating **1.2M+** page views, supporting large-scale academic access and exam preparation.

🌐 HawkEye | **Python, Flask, JavaScript, Plotly.js**

- Built an attack and risk visualization SIEM that ingests security logs, simulates attacker behavior, correlates events into attack paths, and computes dynamic risk scores mapped to the MITRE ATT&CK framework.

🌐 HolmesKit | **PowerShell, Batch**

- Built a modular Windows optimization toolkit applying registry, service, power plan, and TCP/IP tweaks to reduce overhead and improve responsiveness, with automated backups, session logging, and rollback support.

CERTIFICATIONS

- CompTIA Security+
- Cybersecurity Fundamentals (IBM)

- Google Cybersecurity Professional
- Introduction to Cybersecurity (Cisco)
